## **DETAILED ACTION**

### ***Response to Amendment***

#### ***Claim Objections***

Claims 16 and 18-29 are objected to because of the following informalities:

With regard to Applicant's "means for " language of claims 16 and 18-29, the language appears to be an attempt to invoke 35 USC 112, 6<sup>th</sup> paragraph interpretation of the claims. A claim limitation will be interpreted to invoke 35 U.S.C. 112, sixth paragraph, if it meets the following 3-prong analysis:

- (A) the claim limitations must use the phrase "means for " or "step for; "
- (B) the "means for " or "step for " must be modified by functional language;  
and
- (C) the phrase "means for " or "step for " must not be modified by sufficient structure, material or acts for achieving the specified function.

In the instant case, applicant does not appear to have met the limitations set forth in MPEP § 2181. The applicant uses language such as "drive system", "housing", "electronic control circuitry" before the "means" language. This is inappropriate and should be modified if the applicant is trying to invoke 112, sixth paragraph.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the

Art Unit: 3763

applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 4-14, 16, and 19-29 are rejected under 35 U.S.C. 102(e) as being anticipated by Choi (5,993,423). Choi discloses an external infusion device (see at least Figure 16) for infusion of a fluid into a body from a reservoir (21) comprising a drive system (130, 131, 151) to operatively couple with the reservoir to infuse a the fluid into a the body, a housing (120) adapted for use on an exterior of the body, wherein the housing is sized to contain at least a portion of the reservoir, wherein the drive system is at least partially contained within the housing, wherein the drive system operatively couples with the at least a portion of the reservoir within the housing, and wherein the housing is sized to be carried by a user without significant restriction on mobility, electronic control circuitry (123) coupled to the drive system to control infusion of the fluid into the body, wherein the housing has at least one vent port (121, see column 13, line 66- column 14, line 24) covered with a hydrophobic material that permits the passage of air into and out of the housing and inhibits the passage of liquids into the housing through the at least one vent port covered with the hydrophobic material such that air pressure within an interior of the housing but external to the reservoir is equalized with air pressure outside of the housing.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3763

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 3 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Choi (5,993,423). Choi discloses the claimed invention except for using PTFE as the hydrophobic material. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use PTFE, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 227 F.2d 197, 125 USPQ 416 (CCPA 1960).

### ***Response to Arguments***

Applicant's arguments with respect to claims 1, 3-14, 16, 18-29 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
